The Committee for the investigation of frauds in the Revenue Department, has adjourned to reassemble after the holidays. The developments, so far, more than fulfill the promises of those who investigated. The Investigation Committee learned of gigantic frauds which have been practiced in New York, and the Government officials have been amply repaid for the frauds discovered. There are over 300 small distilleries carried on in the city in cellurs and outhouses of private dwellings, where whisky is made for the purpose of evading the tax of two dolars per gallon. The Committee will visit the principal cities of the West when they have concluded their work in New York. The magnitude of the leak they are endeavoring to stop, may be judged from the fact that, according to the census of 1860, the amount of whisky made in the United States was upwards of ninety millions of gallons, and by the last report of the Revenue Commissioner, it was less than ten millions.
